IT IN A BOX[®]

Small business owners searching for IT solutions want a reliable, secure, and easy to use platform offering the services required to be competitive in today's economy. Incorporating WEB Hosting, Domain & Email Servicing, Proxy, built-in Wireless Networking, VPN Server and Firewall services, the IT IN A BOX[®]

platform is the solution for today's small office. Remotely manage your system with our Web Enabled graphical user interface and leave system management worries behind. It's now easier than ever to gain a competitive edge, grow your business and utilize an integrated technology solution.

CoreVista Web® Web Based IT Management Tool

EmergeCore's Web Management tool is an intuitive graphical user interface that allows non-technical employees to configure and maintain IT network services. We have taken the fear out of system management for the small business owner by providing simple, easy to use tools. Follow the online instructions and with a click of your mouse, in minutes, you too can configure your required IT services.

The IT IN A BOX®, an All in One solution for small business, reduces the cost of ownership and management of the most common IT services required at a small business.

CoreVista Web® Website Builder

EmergeCore's CoreVistaWeb™ Website Builder will help you generate a working website for your domain name in just minutes. A non-technical user can build and maintain a basic website for your business by utilizing a series of templates within the CoreVistaWeb® Website Builder. Each page of the website can then be customized as desired using a company logo, photos, sales or technical information; and new custom or standard pages can be added from a selection of templates. Website building has never been easier or less costly for the small business owner.

Compare the Difference

	Current System 1st yr costs	IT IN A BOX® 1st yr costs
DSL (ISP Charges)	\$750	\$750
External Web Host	\$380	-0-
